

BROADBAND WIRELESS INTERNET

OVERVIEW

In the fast paced world of technology the speed at which we gain access to information can prove vital, whether it be assisting in your day to day business activities or helping gain that edge over your competition.

The Arafura Connect Digital Wireless Network is based on the popular 802.11b wireless standard. This technology provides the ability to connect to our network at speeds up to 11Mb/s half duplex.

Broadband Wireless connections are one of the most expandable and flexible network technologies available today. Our Wireless Network can be used to connect a single computer to the internet or to connect multiple offices to a single network.

Arafura Connect owns its network allowing us to completely bypass the phone company to provide uniquely scalable high-speed internet access. Most importantly,

the Arafura Connect network is available in many areas not currently serviced by traditional high-speed internet services.

For more information or to get your connection underway, please contact us on 8947 3063 or e-mail connectme@arafura.net.au

NETWORKS

Arafura Connects Managed Network Solution provides you with all the equipment required to connect your network

to the internet. This service is remotely monitored and managed; in the event that a fault occurs, our technicians are immediately

notified and begin resolution of the problem. This service is perfect for businesses requiring a trouble free internet solution.
